Please use form 3.3 to order stand installations provided by Messe München. To order a main electrical connection, please see forms 3.1 and 3.2. We will be glad to create a separate offer for larger stand installations.

Important to note: See form 4.1 for details of suitable suspension units and lighting equipment.

We hereby order – in the name and on behalf of the above-named exhibitor – subject to the conditions of connection and supply detailed on page 2:

Item no.	Quantity	Installation	Price per item/per m: EUR
32800		Clamp-on spotlight, 100 W bulb (see picture on page 2)	27.30
32801		Clamp-on spotlight with extending arm, 100 W (see picture on page 2)	31.40
32805		Halogen beam light, up to 1500 W	78.05
32821		Halogen spot with extending arm (see picture on page 2)	40.95
32822		Low-voltage spotlight for lighting rail, 12 V/50 W (see picture on page 2)	47.90
32823		Spotlight for lighting rail, 100 W (see picture on page 2)	46.05
32840		1-metre lighting rail, three-phase current	39.55
32772		SCHUKO 6-way safety table socket, 5 m	18.05
32764		SCHUKO extension cable, up to 5 m	10.20
32766		SCHUKO extension cable, up to 10 m	13.40
32706		Cable 3 x 1.5 mm ² , laid fixed – price per metre	4.90
32707		Cable 5 x 1.5 mm ² , laid fixed – price per metre	5.25
32708		Cable 3 x 2.5 mm ² , laid fixed – price per metre	5.45
32709		Cable 5 x 2.5 mm ² , laid fixed – price per metre	6.30
32785		Transformer 1 kVA / 110 V	185.90
32786		Transformer 2 kVA / 110 V	265.25

Please note: The above prices include the rental of equipment, material, delivery and installation.

Low-voltage spotlight for lighting rail
50 W, adjustable

32823
Spotlight for lighting rail
75 W, adjustable

Messe München GmbH's accredited service partners can offer you good value electrical installations incl. lighting for your exhibition stand tailor-made to suit your specific requirements.

The range of products and services offered encompass:

- all electrical engineering needs from the main electrical connection through to end-users (lighting, power, machinery, etc.)
- individual lighting of stand and other specific items

Your benefits include:

- competent consultancy services and planning support offered by specialists with longstanding exhibition experience
- no investment in materials; the materials needed are merely rented
- high availability of materials during entire stand assembly period (at weekends and on public holidays too)
- flexibly available specialist staff with exhibition experience, i.e. no stand-by, transit or overnight costs
- exclusive usage of reliable, tested materials to avoid any subsequent cost- and time-intensive corrective work (problem-free acceptance tests by independent experts)
- absolute compliance with agreed deadlines

Please contact the following companies for help with your electrical engineering needs:

Conditions for the connection and supply of additional electrical installations

1. Please use form 3.3 to order additional electrical installations. Orders and stand diagrams must be submitted no later than six weeks prior to the beginning of stand installation to the MMG Technical Exhibition Services Division. No guarantee can be given for the timely completion of installations applied for after this deadline.
2. **Electrical installations are provided on a rental basis only.**
3. Electrical installations within the stand and downstream of the transfer point between MMG and the exhibitor may be carried out by the exhibitor's own electricians or certified electric service providers.
4. **Serious violation of the regulations (including DIN VDE 0108) will result in the power supply being cut off. In such cases, no refund shall be due on the costs of installations already completed.**
Charges for the main connection will be invoiced in every case.
5. All exhibition stand electrical installations will be inspected by an expert for compliance with the regulations currently effective at the trade fair grounds in Munich. Any deficiencies found are to be immediately rectified. Costs for the inspection by specialists are included in the connection price.
6. **The list of dimensions and tolerances supplied to the exhibitor or ordering party should be reviewed, countersigned and returned as soon as possible. This list will also be used subsequently for invoicing purposes. Complaints pertaining to the scope of products and services provided must be addressed to the Technical Exhibition Services Division at Messe München GmbH prior to stand dismantling in order to allow the opportunity for an appropriate assessment. Subsequent complaints regarding the scope of products or services will not be acknowledged.**
7. Repair work conducted on equipment not installed by MMG will be invoiced according to actual labour hours required.
8. Orders may be withdrawn up to 14 days before the general stand installation period begins; the exhibitor will be charged for the connections ordered in cases of cancellations submitted after this deadline.
9. The exhibitor is obliged to disconnect the power supply daily after the exhibition closes, using the master switch incorporated in the main connection. Circuits for devices needing a continuous current supply (separate outlets and circuits required) are exempt. The exhibitor shall be fully liable for the electrical installation and use thereof within the exhibitor's stand area.
10. **For safety reasons, Messe München GmbH reserves the right to switch off the entire power supply to exhibitors after the end of the event. After the final day, this will not apply to exhibitors whose power supply order includes the stand dismantling period.**
11. The General Terms of Contract for the Exhibitors' Service Booklet shall be considered an integral part of this contract.
