Place, date _____

Company stamp and legally binding signature of exhibitor _____

Orders placed for spotlights and reflector lamps include power supply cabling to the main electrical connection (any power supply cabling required via the hall ceiling incurs additional costs and will be charged separately).

2008

Terms of business for the supply and installation of support frame and lighting systems

A. Safety

1. For safety reasons, the following types of suspensions are **not permitted**:
 - Items suspended from stand elements
 - Suspensions intended to support stand elements or exhibits (stand elements and exhibits must be independently secured)
 - Items suspended from the ceiling with a rigid or frictional connection to the hall floor.
2. The suspension units may only be altered (e.g. opening a bridle) by one of MMG's accredited service partners.
3. It is imperative that the responsible MMG subcontractor be consulted with regard to the use of hoisting equipment (e.g. chain hoist, motor hoist).

Please note:

- Load-bearing end-to-end cable connections
- may not be implemented using cable clamps
 - must conform with DIN 56 921-11
4. With regard to the attachment and securing of objects to be suspended, pertinent safety regulations and in particular German safety ordinances BGV A1 (general regulations), BGV C1 (venues and production sites for stage performances), BGV D8 (hoisting, lifting and winching equipment), and, if applicable, VStättV (German safety code governing places of public assembly) must be observed. (see also the "Attachment and Securing Systems Information Sheet" that is available from MMG's Technical Exhibition Services Division as well as VPLT.SR1.0 "Supply and Usage of Truss Systems").

B. Technical details and important information

1. To the extent structurally feasible, Messe München GmbH will provide the exhibitor with a fixing point at the desired position above the stand floor area and within the stand perimeter.
Please note: Constructions to be suspended may be placed only within the stand area. MMG will review documentation submitted for feasibility of the desired fixing points.
2. Hanging of items from the hall ceilings will be carried out exclusively through Messe München GmbH's responsible contractor companies.
3. Each suspension point on the hall ceiling structures may carry a maximum 100 kg perpendicular load. The maximum area load is 5 kg/m² stand area. Suspension units for heavier loads only on request. If a fixing point in Halls A1-A6, B1-B6 or C1-C4 as ordered is not positioned directly beneath a suspension point, the fixing point will be installed using two or three suspension points.
 - Each fixing point (transfer point) ends in an O-ring.
 - Steel cable with a diameter of 6 mm (item no. 32900) and 8 mm (item no. 32908) is used for suspension purposes.

Exhibitors will be invoiced for damage to equipment.
4. Fixing objects to be suspended (light trusses, spotlights, banners, flags, etc.) at the fixing points is the responsibility of the exhibitor or the exhibitor's contractor.

Materials required to attach elements to the fixing points are not included in the standard service, but are available for rental from MMG upon request.
5. **The main electrical connection for lighting, etc. should be ordered separately using form 3.1.**
6. **Additional equipment: The power supply cable is generally run from the hall floor to the lighting system. A supply cable can also be run from the hall ceiling, on request (separate offer).**

C. Required plan documentation, order deadline

1. For the order to be processed, drafts of the side view elevation and stand area ground plan including projection of fixing points must be submitted (1:100 or 1:50 scale).
The plans must also include total weight of each construction to be hung, distance from fixing points to stand boundaries and their height above the hall floor surface. Please include an arrow pointing north in the drawing or indicate the location of the neighbouring stands and let us know the date on which the fixing points are required. If no written details are provided with regard to the height the required fixing points are to be installed above the hall floor, they will be fitted at a height of 6 m.
2. Order including complete plan documentation is to be submitted no later than six weeks before the official stand assembly period begins. In cases of late submission of orders or plan documentation, no guarantee can be given concerning availability of suspension points.
MMG reserves the right to invoice a surcharge for late orders.
3. Cancellations can only be made up to 14 days prior to the commencement of the official stand assembly period. In the case of cancellations received later than this, the services ordered will be charged.
4. Messe München GmbH's General Terms of Contract for Exhibition Services apply additionally.

Price information:

Item no.	Product/Service	Price
32943	Travelling and climbing scaffolding/h	54.10
32940	Supervision/Work per hour	40.70
32924	Cable up to 6 kW/m	1.30
32925	Cable up to 12 kW/m	2.55
32921	Steel cable/Safety, each	5.90
32926	Aluminium clamps with O-rings, each	11.80
32914	Clevis, each	5.90
